

# **SETTING OUT FOR A SUCCESSFUL RESEARCH CAREER: FOUNDATIONAL MASTERY TIPS**

**Presenter:**

**Dr. Samuel Eshorame Sanni**  
**Associate Professor, Chemical**  
**Engineering**

**(Deputy Director Research/Research Coordinator, Covenant  
(University Center for Research, Innovation and Discovery: CUCRID))**

**@ the 1<sup>st</sup> CUCRID RESEARCH CLINIC SERIES, COVENANT UNIVERSITY**

**May 15, 2024**

# PRESENTATION OUTLINE

- **Research as an Art**
- **Developing a good research culture**
- **Defining your research interests and goals**
- **Familiarity with research and publishing ethics**
- **Codes of conduct and rules of engagement**
- **Exploring and exploiting Journal finders**
- **Prioritizing top-rated journals**
- **Indexing databases**
- **Avoiding predatory journals**
- **Rudiments for publishable research**
- **Preparing a manuscript for submission**
- **Manuscript Organization**

# RESEARCH: AN ART

Research- the art of systematically investigating the study of materials and their sources in order to establish facts with dependable conclusions

## DEVELOPING A GOOD RESEARCH CULTURE

- Developing a good research culture requires, a suitable environment, time, resources (material, human, financial) and energy as investments
- It requires also defining one's research interests; this needs to be tactically done.
- Research interests must be carefully separated from/crafted into one's area(s) of specialization (simple examples: Catalysis (specialization): fluid-solid reaction (interest 1) systems, Liquid-liquid-reaction systems (interest 2) etc.

- Defining your research goals: Sit for a moment and ask yourself this genuine question; how professional would you be in a 5-10 year projection-plan?
- Short/Long term goals: purpose, scope, depth, strategy, research interest
- The above question helps you define your goals with clearly defined targets and indicators.

## FAMILIARIZATION WITH RESEARCH & PUBLISHING ETHICS

Research ethics entail the pros and cons in conducting research:

- being an author/co-author
- integrity test,
- honesty
- avoiding concurrent submissions
- avoiding ill/redundant citations
- adherence to formatting guidelines, apt reviewer selection, copyright rules, publishing open (green and gold) access and subscription etc.

# CODES OF CONDUCT AND RULES OF ENGAGEMENT

- Copyright licences - CC4.0/NC/C etc.
- Authorship declaration
- Declaration of conflicts of interests
- Defining author-credit roles
- Data authentication and availability
- Manuscript submission is like taking an oath (nonredundant submissions)
- Carefully studying author guidelines
- Mandatory components and other inclusions
- Adherence to data/graphics presentation formats, acknowledgement of funders etc.

## Copyright License Chart: Four Components in Six Configurations:

CREATIVE COMMONS LICENSES		 COPY & PUBLISH	 ATTRIBUTION REQUIRED	 COMMERCIAL USE	 MODIFY & ADAPT	 CHANGE LICENSE
	PUBLIC DOMAIN	✓	✗	✓	✓	✓
	CC BY	✓	✓	✓	✓	✓
	CC BY-SA	✓	✓	✓	✓	✗
	CC BY-ND	✓	✓	✓	✗	✓
	CC BY-NC	✓	✓	✗	✓	✓
	CC BY-NC-SA	✓	✓	✗	✓	✗
	CC BY-NC-ND	✓	✓	✗	✗	✓

				
You can redistribute (copy, publish, display, communicate, etc.)	You have to attribute the original work	You can use the work commercially	You can modify and adapt the original work	You can choose license type for your adaptations of the work.

 Creative Commons: The Ultimate Guide by foter.com is licensed under a Creative Commons Attribution-ShareAlike 3.0 United States License. Based on a work at <http://bit.ly/1eWg7W3>

- BY- Attribution reqd.
- NC- Noncommercial use
- ND- No derivative works
- SA - Share alike

# EXPLORING AND EXPLOITING JOURNAL FINDERS

- Journal finders (JFs) and Journal Pools (JPs) are tools for searching apt journals for submission (use abstract, paper title, keywords)
- Elsevier -JF
- Springer- JF
- Taylor and Francis-JP
- Wiley -JP etc.

# PRIORITIZING TOP-RATED JOURNALS & INDEXING DATABASES

- Scopus only (Qs): (Q1, 75<sup>th</sup>-100<sup>th</sup> percentile); Q2, 50<sup>th</sup>-74<sup>th</sup> percentile); (Q3, 25<sup>th</sup>-49<sup>th</sup> percentile) ; (Q4 0<sup>th</sup>-24<sup>th</sup> percentile)
- Web of Science only- SCI, SCIE and ESCI
- Journals in WoS & Scopus

# AVOIDING PREDATORY/NEAR-PREDATORY JOURNALS

- Journal history
- Editorial board membership
- Alignment of journal aims/subject categories with published articles
- Peer review integrity
- Spontaneous/superfluous peer review and publication cycle/time
- Name duplication/adoption/similitude with a high profile journal
- Very poor journal trends or metrics

# RUDIMENTS FOR QUALITATIVE RESEARCH PUBLICATION

- Adopt a good research plan
- Deploy apt research tools
- Conduct quality checks and good experimentation/survey/analysis/investigation
- Subscribe to periodic alerts from top-rated journals that publish related subjects
- Develop a good reading culture
- Play the role of a critic and develop critiques that will improve your manuscript
- Register or be part of early/budding researcher-workshops, webinars, researcher communities etc.

# PREPARING A MANUSCRIPT FOR SUBMISSION

- Abstract (Graphical/main abstract)
- Introduction
- Theoretical framework/review of literature
- Materials and method/survey questionnaire administration/research questions/interview sessions/secondary and primary data gathering/Analysis
- Results and discussion
- Conclusion
- Recommendation (Future outlook or projections/new wave technologies/current trends, policy directions etc.)
- References
- Supplementary files

## CONCLUDING REMARKS

- Acquaintance with the fundamentals of research is necessary for a successful research career
- Familiarity with research and publishing ethics sets a researcher on a clearer path which may be void of pitfalls
- Strict adherence to the codes of conduct of research makes for research integrity void of ill conscience
- Avoiding predatory journals is the channel to charting your way up the rungs of the success-ladder
- Dare to cast your nets in deep waters (top rated journals); big fishes don't swim in shallow waters

Thanks for your audience!
